

SiteApex[™] v2.0

SiteApex[™] provides organizations with the dynamic ability to manage the content of their website with limited computer knowledge required. Our professional developers have done the work for you, now your job is simply to keep the material up to date. Multiple people responsible for different sections of your organizations' website can connect to our user-friendly administration screen and update their information through use of the OSM Editor[™]:

To get you started, comes pre-configured with the following category pages: Home Page, Products and Services, Staff, Photo Album, Calendar, Newsletter and Email Contact List.

Use SiteApex[™] to create, modify or delete any number of pages then simply select "Compile Site Now" and have SiteApex[™] populate those changes to your live website! Even the professionally designed navigation is dynamic. As you add new pages through our user-friendly administration screen, these new pages will automatically appear as new categories or sub-categories on your site navigation. Creating a website and keeping your site current has never been easier !

Bundled Plan Details...

Intro Plan	Mid Plan	Advanced Plan
